

Introduction

### Motivation

The above `\section*{}` creates a gap, this can be altered through the `titlespec` package.

Because of how TikZPosters is designed, one needs to be explicit about gaps between newlines

doing  
this  
has  
no  
effect

You need to use `\\` like this

now

this

works

Lorem ipsum dolor sit amet

Method

You can use `multicols` for a two-column layout here or adjust the column-sizes back to `0.333 — 0.333 — 0.333` using the nice macro `\third`, e.g. `\column{\third}`.

Results

Some results

Conclusion

This is the conclusion.

B

Lorem ipsum dolor sit amet
